## Przyczynki do metodologii lingwistyki

Jerzy Pogonowski, Tadeusz Zgółka (eds.). *Przyczynki do metodologii lingwistyki*. (Contributions to the methodology of linguistics.) Adam Mickiewicz University Press, Poznań 1996, pp. 167. Seria Językoznawstwo nr 21. ISBN 83-232-0741-0. ISSN 0239-7617.

All the articles in this volume concern problems of the methodological foundations of linguistics. The spectrum of the problems which have been touched upon is rather wide: you will find here works on computer linguistics (an algorithm for the construction of phonemes, communication between human and computer), categorial grammar, logical foundations of linguistic typology, pragmatics (analysis of questions, logical reconstruction of pragmatics), psycholinguistics (theories of concept formation), philosophy of language (an interpretation of Wittgenstein's ideas, universal semantic matrices), and, finally, history of linguistics. The book may be of interest to linguists, logicians and philosophers.
